

Data governance sprint for start-ups and scale-ups

At Trace® we understand innovators. As a young company ourselves, we know that flexibility, agility and focus matters. That's why we developed a package especially designed for data-driven companies: the data governance sprint.

This focussed three-step project has been created for companies who need a practical toolkit for compliance, and it's been proven to deliver successful results. The outputs help our clients tackle gaps and risks, and unlock benefits, with evidenced-based governance for investors, clients and stakeholders to build trust.

Step 1

Discover & analyse

Discovery meeting
Map data lifecycle and UX
Understand data role architecture

Step 2

Playback

Gap, risk & SWOT analysis
Stakeholder presentation

Step 3

Deliver

Key artefacts and baseline policies
Data Protection Impact
Assessment (DPIA)
